GLAUCOMA HANDBOOK

St. Luke's Medical Center
Quezon City • Global City
CONTENTS

Introduction Mario V. Aquino, M.D. xi

Section I: Risk of Blindness in Glaucoma
Jose Ma. G. Martinez, M.D. 1

Section II: Evaluation of a Glaucoma Patient
Chapter 1 History and Examination of the Glaucoma Patient
Jose Ma. G. Martinez, M.D. 5

Chapter 2 Gonioscopy
Ernesto C. Pangalangan, Jr., M.D. 15

Chapter 3 Qualitative Structural Examination of the Optic
Nerve Head and Retinal Nerve Fiber Layer
Mario R. Aquino, Jr., M.D. 25

Chapter 4 Quantitative Structural Imaging of the Optic Nerve
Head and Retinal Nerve Fiber Layer
Alejandro N. Chung, M.D. 35

Chapter 5 Functional Evaluation: Automated Visual Field
Examination
Maria Margarita Lat-Luna, M.D. 47

Chapter 6 Structure and Function Correlation in Glaucoma
Joseph Anthony J. Tumbocon, M.D. 67

Section III: Primary Glaucomas
Chapter 7 Glaucoma Suspect and Ocular Hypertension
Ernesto C. Pangalangan, Jr., M.D. 73

Chapter 8 Primary Open-Angle Glaucoma
Ernesto C. Pangalangan, Jr., M.D. 77

Chapter 9 Normal-Tension Glaucoma
Ernesto C. Pangalangan, Jr., M.D. 81

Chapter 10 Primary Angle-Closure Glaucoma
Mario V. Aquino, M.D. 85

Section IV: Secondary Glaucomas
Chapter 11 Steroid-Induced Glaucoma
Rommel D. Bautista, M.D. 95

Chapter 12 Pigment Dispersion Syndrome and Pigmentary
Glaucoma
Rommel D. Bautista, M.D. 97

Chapter 13 (Pseudo)exfoliation Syndrome and Glaucoma
Rommel D. Bautista, M.D. 99

Glaucoma Handbook V
Chapter 14  Glaucomas Due to Ocular Inflammation  
*Rommel D. Bautista, M.D.*

Chapter 15  Angle Recession  
*Rommel D. Bautista, M.D.*

Chapter 16  Hyphema with Elevated Intraocular Pressure  
*Rommel D. Bautista, M.D.*

Chapter 17  Ghost Cell Glaucoma  
*Rommel D. Bautista, M.D.*

Chapter 18  Glaucoma Resulting From Chemical Injury  
*Rommel D. Bautista, M.D.*

Chapter 19  Neovascular Glaucoma  
*Aragon B. Belza, M.D.*

Chapter 20  Lens-Induced Glaucoma  
*Aragon B. Belza, M.D.*

Chapter 21  Elevated Intraocular Pressure After Cataract Surgery: Glaucoma Associated with Aphakia and Pseudophakia  
*Aragon B. Belza, M.D.*

Chapter 22  Elevated Intraocular Pressure After Penetrating Keratoplasty  
*Aragon B. Belza, M.D.*

Chapter 23  Glaucoma Associated with Retina Surgery  
*Don Vincent L. Salud, M.D.*

Chapter 24  Aqueous Misdirection  
*Don Vincent L. Salud, M.D.*

Chapter 25  Suprachoroidal Hemorrhage  
*Don Vincent L. Salud, M.D.*

Chapter 26  Fuchs’ Endothelial Dystrophy  
*Maria Hannah Pia U. de Guzman, M.D.*

Chapter 27  Epithelial and Fibrous Ingrowth  
*Maria Hannah Pia U. de Guzman, M.D.*

Chapter 28  Iridocorneal Endothelial Syndrome  
*Maria Hannah Pia U. de Guzman, M.D.*

Chapter 29  Axenfeld-Rieger Syndrome  
*Maria Hannah Pia U. de Guzman, M.D.*

Chapter 30  Peters’ Anomaly  
*Maria Hannah Pia U. de Guzman, M.D.*

Chapter 31  Persistent Hyperplastic Primary Vitreous and Retinopathy of Prematurity  
*Maria Hannah Pia U. de Guzman, M.D.*

Chapter 32  Aniridia  
*Maria Hannah Pia U. de Guzman, M.D.*
Acknowledgements

Filipinas Natividad, Ph.D, Vice-President and Director for Research and Biotechnology of St. Luke’s Medical Center, for her unending support.

Noel G. Chua, MD, Director of the International Eye Institute of St. Luke’s Medical Center Global City, for his help in initiating this project and his guidance.

Jubaida M. Aquino, MD, consultant of St. Luke’s Medical Center Quezon City, for proofreading the manuscript.

Raymond Nelson C. Regalado, MD, Chief Resident of the International Eye Institute 2012, for the cover design of the book.

Ruben Lim Bon Siong, MD, Director of the International Eye Institute of St. Luke’s Medical Center Quezon City, for his continuous encouragement.

St. Luke’s Medical Center management and the Research and Biotechnology Division for supporting this project.

Our trainees and colleagues for giving us insights on the structure and content for this book.
Foreword

It has been said that there is no greater legacy in the field of medicine than to have a book published. This Glaucoma Handbook is a fitting tribute to a man who has devoted his entire professional career to the study and practice of glaucoma. The primary editor, Director Emeritus Mario V. Aquino, was the founding chair of the Department of Ophthalmology of St. Luke’s Medical Center. And after three years of hard work with the brilliant consultants of the Glaucoma Service, it is a pleasant coincidence that this book was launched on the 25th year anniversary of the department now known as the International Eye Institute.

The publication of this book is in line with the innovative spirit and trailblazing culture of the International Eye Institute and St. Luke’s Medical Center as a whole. Proud to be first in many aspects in the field of ophthalmology, the Institute was the first in the country to publish the widely successful *Handbook on Optical Coherence Tomography* authored by the Retina Service five years ago. This Glaucoma Handbook is second in the list of planned publications by the Institute. All these were made possible with the support of the Medical Center through a grant given by the Research and Biotechnology Division.

This book is intended to spread the knowledge in understanding, diagnosing and treating glaucoma based on the collective expertise and experience of Filipino glaucoma specialists for the benefit of the Filipino patients. Great effort has been made to incorporate as much local data as possible to make this handbook widely applicable in the Philippines as well as in South East Asia where glaucoma is a leading cause of blindness.

This quick reference guide contains the essentials of the important and complex group of conditions known as glaucoma. It covers all aspects of glaucoma care from assessment to diagnosis to management. While it includes the requisite chapters on the primary glaucomas, it also provides succinct information on a wide assortment of secondary glaucomas. This concise and user-friendly book will be helpful for ophthalmologists in practice and in training.
